

FISCAL NOTE

SB 3028 - HB 2753

March 12, 1998

SUMMARY OF BILL: Redefines "beer" to exclude malt-based beverages.

ESTIMATED FISCAL IMPACT:

Increase State Revenues - Exceeds \$600,000 / Net Impact
Decrease Local Govt. Revenues - Exceeds \$1,000,000 / Net Impact

Assumes that the change in classification for such beverages from "beer" to "alcoholic beverages" would make them subject to the state wine tax at \$1.10/gallon and the local municipal inspection fee. Such beverages are currently subject to the local 17% wholesale tax and the state barrelage tax of \$3.90/barrel. The estimate also assumes that sales of such beverages would decrease by approximately 25% due to the more limited availability of such beverages.

The following assumptions were made for illustrative purposes:

- Approximately 3,000,000 malt-based beverage 4-packs sold per year under the current law would generate \$840,000 in tax revenues to the state and \$1,537,500 in tax revenues to local governments.
- Approximately 2,250,000 malt-based beverage 4-packs sold per year under the provisions of this bill (assuming a 25% decrease in sales) would generate \$1,440,000 in tax revenues to the state and \$495,000 in tax revenues to local governments.
